

OSA - 1830-64

1 April 1964

STATINTL

Dear [REDACTED]

Re: Contract EG-400
Interim Invention Report

No subject inventions have been made under this contract since the date of our last report and no payments for royalties in excess of \$500 have been made during this period. The contract is continuing and additional reports will be filed.

Our invention report of 11 April 1962 listed, among others, Invention Report K-11614, Docket 23,729 - [REDACTED] "Rear Projection Screen" with the information that Kodak planned to file a patent application for this item. Since that time a novelty search has disclosed U. S. 2,132,405, Draeger, and U. S. 1,694,706, Herz, covering this area. There does not seem to be any patentable novelty in the reported invention and, therefore, Kodak does not now plan to file an application.

We wish to reserve all rights to which we may be entitled in case the Government files such an application.
